## DEVELOPMENTAL FOCUS

**Social/Emotional:** This is socialization. It is how your child becomes a confident person. We encourage this by having your child relate to other people—both children and adults, taking responsibility for themselves and others by following rules and routines, and respecting others by sharing and taking turns.

**Physical:** Our program provides daily playground or gym play and two 45 minute swim lessons per week. Physical development is just as important as academic development. As children learn what their bodies can do, they gain self confidence. The more they can do, the more willing they are to try new and challenging tasks. Thus, a positive cycle, which affects learning overall, is established.

**Cognitive:** This involves how children think, how they see their world, and how they use what they learn. They will be offered ways to observe the world around them, encouraged to ask questions, shown how to think logically by comparing, sorting, contrasting, counting, and recognizing patterns. Playing pretend and drawing pictures of how they see things allows them to use not only materials but their imagination to explore ideas.

**Language:** This includes understanding and communicating through words, spoken and written. As children learn to listen and speak, they gain control of themselves and their world, relate effectively to others and gather and store more and more information. By giving them an understanding of how letters look and sound, they gain knowledge of the alphabet. We achieve this by encouraging their ability to communicate thoughts and feelings by listening, speaking, reading, and writing.
